

Diamond Hills Sports Club

This Oakley-based athletic facility includes 17 outdoor tennis courts and 3 heated swimming pools as well as group exercise, cycling, and Pilates studios. Its amenities also include a well-appointed spa and a play-center and kids' club.

THE CHALLENGE

Fitness facilities use a lot of energy. This is because they operate for extended hours with the need to provide a safe and secure environment for their members. And with many facilities offering both interior and exterior fitness areas, facility management must ensure that all spaces are properly lit. All of this is what Diamond Hills Sports Club faced when looking to execute an energy efficiency plan. With specific ROI goals in mind, energy efficiency rebates made this project possible and allowed this facility to modernize its lighting technology while enhancing its guest experience.

THE SOLUTION

16
INTERIOR LIGHTS

124
EXTERIOR LIGHTS

THE BENEFITS

After a comprehensive walkthrough, our field staff recommended a measure set that would help our client achieve significant energy and utility savings. The costs of these savings solutions were partially covered through incentives available via The Hospitality Program partnership. The final project benefited both the business and the environment, and the results speak for themselves.
